K V Sai Madhav

DevOps Engineer | AWS | Kubernetes | CI/CD | Cloud Infrastructure
Hyderabad, India | +91-7702596857 | kvsaimadhav@gmail.com | LinkedIn: linkedin.com/in/sai-madhav-761759335 | GitHub: github.com/kvsaimadhav

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of hands-on experience in cloud infrastructure management, CI/CD automation, container orchestration, monitoring, and production support. Proven ability to deploy, manage, and scale applications across AWS environments with a strong focus on reliability, security, and automation. Experienced in supporting OTT, SaaS, and enterprise-grade systems.

CORE DEVOPS & CLOUD SKILLS

- Cloud Platforms: AWS (EC2, EKS, EBS, S3, IAM, VPC, CloudWatch, Systems Manager), Azure (VM, Backup Vault – working knowledge)
- CI/CD & Automation: GitHub Actions, Jenkins, Git, Shell Scripting, Cron Jobs
- Containers & Orchestration: Docker, Kubernetes (EKS), Docker Compose, Helm (working knowledge)
- Monitoring & Logging: CloudWatch, Prometheus, Grafana, Loki, ELK Stack (working knowledge)
- Web & App Servers: Nginx, Apache Tomcat
- Databases: MongoDB, MySQL – backup, restore, and connectivity management
- Security: IAM Roles & Policies, SSL Certificate Management, IP Whitelisting, Access Control

PROFESSIONAL EXPERIENCE

Ekluvya — Senior Software Developer | Dec 2024 – Present

- Own and manage AWS cloud infrastructure for a large-scale Edu-Tech OTT platform serving Web, Mobile, and Smart TV users.
- Provisioned and managed EC2 instances, EKS clusters, VPC networking, IAM roles, and storage services to support production workloads.
- Containerized MEAN stack applications using Docker and deployed them on Kubernetes (EKS), improving deployment consistency by ~40%.
- Designed and maintained Dev, Staging, and Production environments, reducing release-related incidents by ~30%.
- Implemented centralized monitoring and alerting using CloudWatch, improving issue detection and response time by ~50%.
- Performed routine server maintenance, scaling operations, and troubleshooting for production incidents.
- Worked closely with engineering leadership to optimize cloud resource utilization and improve cost efficiency.

Neemus Software — Software Engineer (DevOps Focus) | Aug 2023 – Sep 2024

- Supported CI/CD-driven deployments for SaaS applications used by government and defense clients (ADA, LRDE).
- Configured and maintained automated build and deployment pipelines, ensuring reliable application rollouts.
- Managed Git repositories, branch strategies, and access controls for multiple application teams.

- Deployed and supported applications across Dev, QA, and Production environments.
- Handled production issues related to deployments, server health, database connectivity, and application errors.
- Collaborated with development, QA, and operations teams to coordinate releases and improve service uptime.

DRDO (DRDL) — Server Engineer | Aug 2022 – Aug 2023

- Managed Linux-based servers hosting enterprise Java/JSP applications in AWS environments.
- Designed and implemented automated backup and restore strategies (daily, weekly, monthly), achieving near-zero data loss.
- Performed server monitoring, patching, and routine maintenance to ensure system stability and security.
- Supported replication of in-house applications to cloud infrastructure for improved availability.

KEY PROJECTS & HANDS-ON EXPERIENCE

- Ekluvya OTT Platform: Designed and operated AWS infrastructure using Docker and Kubernetes; enabled scalable multi-environment deployments.
- CI/CD Automation: Built and maintained pipelines for frontend and backend services, reducing manual deployment effort.
- Monitoring & Observability: Implemented dashboards and alerts using CloudWatch and Prometheus–Grafana stack (working exposure).
- Backup & Recovery Automation: Designed automated backup strategies for databases and servers.

EDUCATION & CERTIFICATION

Master of Science in Computer Science – Central Michigan University, USA (GPA: 3.93/4.0)
Bachelor of Technology in Electronics & Communication Engineering – BITS Pilani, Hyderabad (GPA: 7.71/10)
AWS Certified Developer – Associate

SOFT SKILLS & WORKING STYLE

- Strong troubleshooting and root-cause analysis skills
- Clear communication with developers, QA, and stakeholders
- Ownership-driven approach to production systems
- Comfortable working in high-availability and production environments
